### Program Service/Activity, Outcomes, Outputs and Measurements

The Department of Housing and Urban Development (HUD) has developed an outcome performance measurement system for key HUD Housing and Community Development Programs. This system describes Performance Measurements as specific goals, outcomes and outputs. From the HUD goals, and the outcomes and outputs definitions listed below, please complete the following table by selecting the one which best reflects your anticipated goal and outcomes. Please refer to HUD's website for more information on HUD's requirements for Performance Measurements at:

https://www.onecpd.info/resources/documents/PerfMeasurementHomelessSystems Presentation.pdf

Goals		<u>Outcomes</u>		Output Indicators	
1. Create Suitable Living Environment: This goal relates to activities that are designed to benefit communities, families, or individuals by addressing issues in their living environments. [Homeless Assistance (Operating Costs and Essential Services) only.]  2. Decent Housing: This goal focuses on housing programs where the purpose of the program is to meet individual family or community needs and not programs where housing is an element of a larger effort. [Homeless Prevention only.]		i. Availability/Accessibility: This outcome applies to activities that make services, infrastructure, public services, public facilities, housing, or shelter available or accessible to individuals, residents or beneficiaries. [Homeless Assistance (Operating Costs and Essential Services) only.]  ii. Affordability: This outcome applies to activities that provide affordability; it can include the creation or maintenance of affordable housing, basic infrastructure, or services such as transportation or day care to persons at lower cost than market rate. [Homeless Prevention only.]		Output indicators tell whether an outcome will occur.  Each output should relate to the intended outcome/goal of the program activity or major service objective.  Output (quantified) + Outcome + Activity/Major Service (description) + Goal. Combing these components summarizes the agency's activities, intended outcomes and purpose in a manner that quantifiably measures results.
